Order form for Solid Surface Shower Base

Print clearly and complete ALL sections carefully - For matching Shower Niche see over page

IMPORTANT

Please consider all options carefully prior to placing your order as custom made bases cannot be returned

Customer name (please print) _____ Customer signature _____ Delivery Suburb/Post Code _____

PRODUCT TYPE - IMPORTANT

Depending on the size of the base and the outlet position it may be necessary to use our thicker (19/20mm) solid surface.

This is to ensure that the machined fall to the waste is compliant with NCC AS3740 10.2 which stipulate a fall of 1:60 - 1:80

Maximum size base using 12mm solid surface = 1200 x 1200, or, up to 900 x 1800 with centre outlet only.

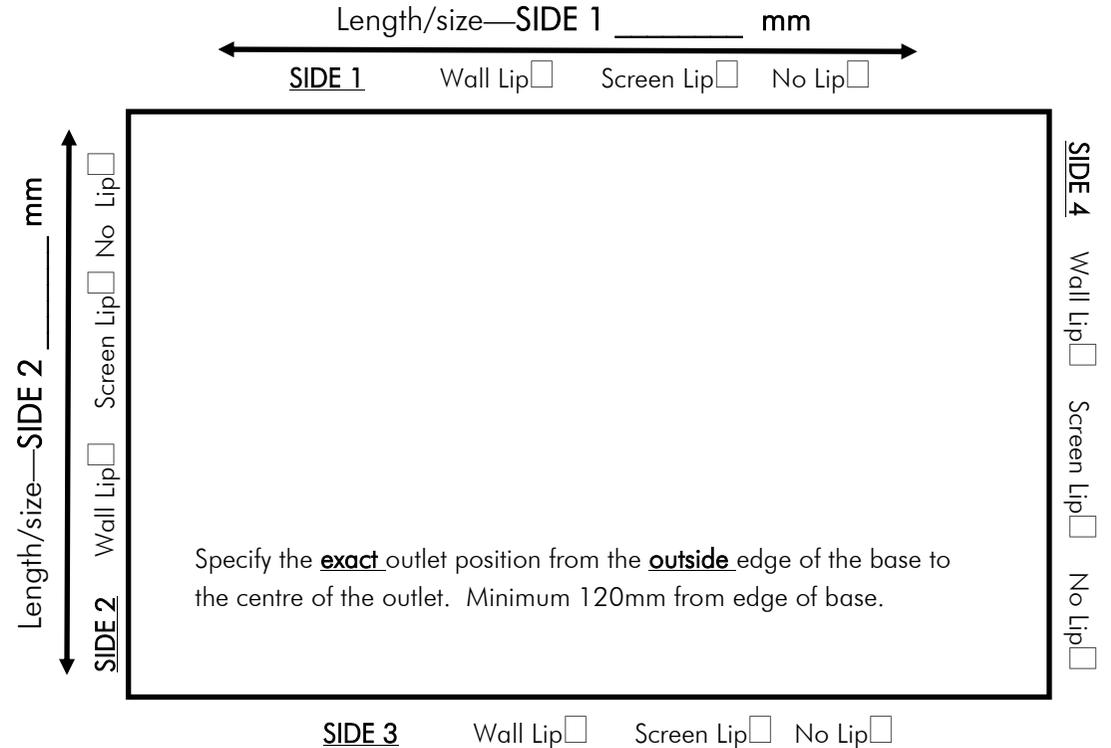

It is the responsibility of the installer to comply with NCC regulations by either ordering the appropriate base thickness or by using packers to achieve required fall.
